10½	8	43	26.5	7½	41	10½	26.7	10.5

Measure your foot

- Stand on a sheet of paper, heel against a wall, in the socks you will wear.
- Mark the tip of your longest toe, pencil held straight.
- Measure from the edge of the sheet to the mark. Do both feet, keep the longer.

Read the chart

- Take the line equal to or just above your foot length.
- Between two lines, take the larger size.
- If a brand publishes its own chart, that chart wins.
